

# THE PROCESS OF FREQUENCY BIND FOR 2.4GHz R/C SYSTEM

1. Press the switch for frequency bind, then turn on the transmitter's power.

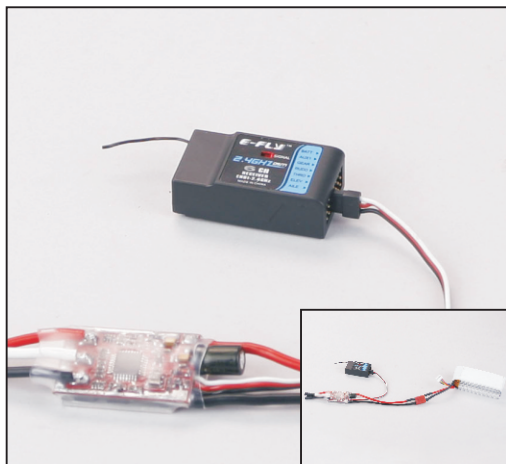

2. Connect the ESC to receiver for electricity supply, which results to the indicator light glitter. And then plug the short-circuit plug into the Receiver in the position of BATT.

3. If the frequency bind is successful, the indicator light will extinguish.

4. Press frequency bind switch again to get it rebound. The transmitter get into working mode.

5. The indicator light turns bright again seconds after pulling out the short-circuit plug, which means that the radio system can work normally now.
