

FMS 在Windows Vista下安装补充说明

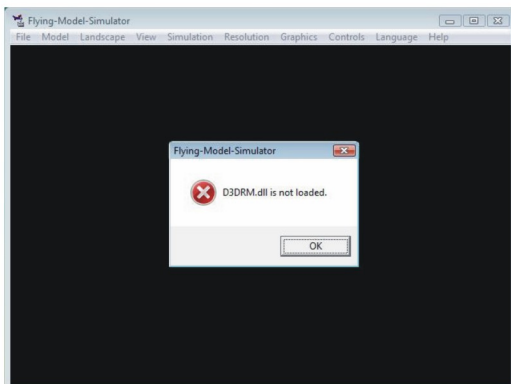

由于Windows Vista系统不支持FMS软件，所以在安装完成运行时一般会出现如图问题：

解决方案如下：

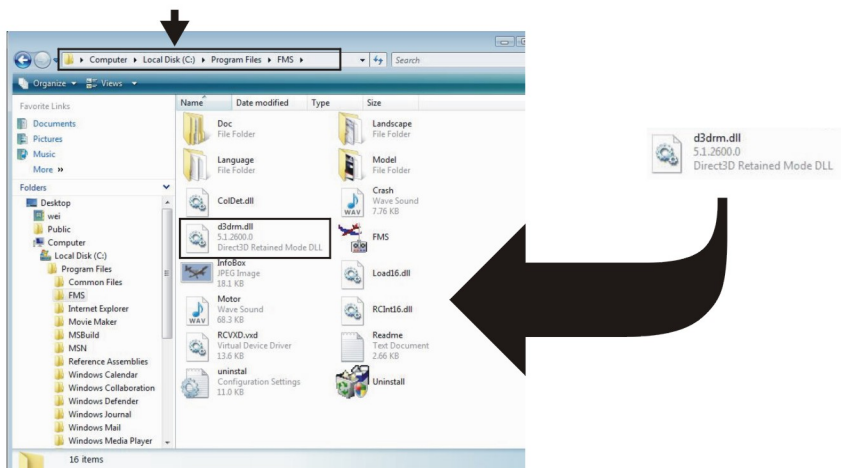

1, 在安装完  后，从艾特航模网站（www.art-tech.cn）下载Vista补丁

文件  d3drm.dll
5.1.2600.0
Direct3D Retained Mode DLL

（如果模拟器配套光盘没有此文件）

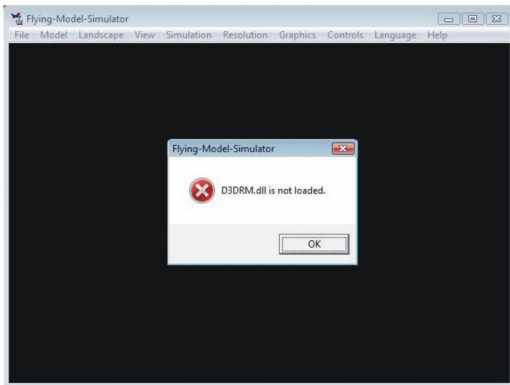

2, 将补丁文件拷贝到FMS的安装目录下即可，一般安装目录为C:\Program Files\FMS。

3, 如果仍有问题或者想了解更多的信息，请参考FMS官方网站论坛，（链接：http://n.ethz.ch/student/mmoeller/fms/index_e.html）

Supplementary Explanation of Installing FMS in the Windows System Vista

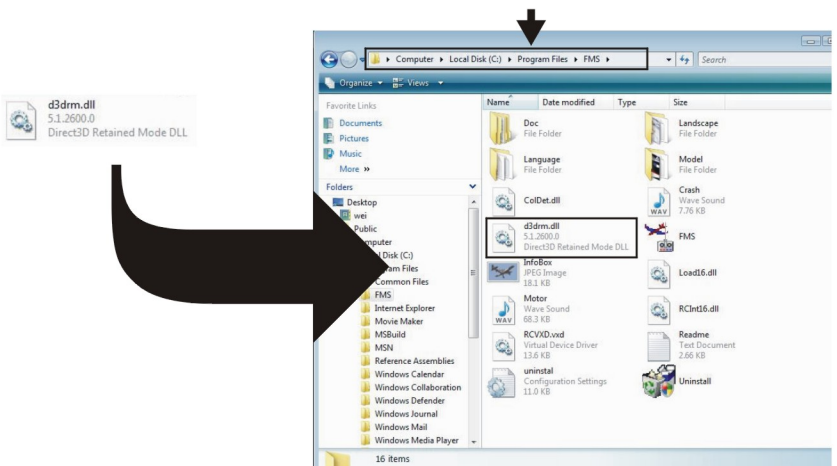

As the Windows Vista System does not support FMS, a problem as shown in the figure will occur when running the software after installation.

Solution is as follows:

1, after installing , download the Vista patch  (if it can not be found in the simulator CD) from the website of ART-TECH R/C Hobby Co., Ltd.(www.art-tech.cn)

2. copy the patch to FMS installation directory and you can use FMS, the usual installation directory is C:\Program Files\FMS.

3, if there are still questions or if you would like to know more information, please refer to FMS official website forum, link: http://n.ethz.ch/student/mmoeller/fms/index_e.html
